Inspection Summary

Inspection on May 9-10, 1979 (Report No. 50-87/79-02)

Areas Inspected: Routine, unannounced inspection of the licensee's security plan and its implementation relative to the protection of SNM; security organization; access control; alarm systems; keys, locks and hardware; communications; surveillance; procedures; security program review; and protection against radiological sabotage. Additionally, the inspectors reviewed the previously identified weaknesses and item of concern. The inspection involved 22 inspector-hours onsite by two NRC inspectors.

Results: Of the eleven areas inspected, no apparent items of noncompliance were identified within the scope of the inspection.
