Metropolitan Edison Company  
ATTN: Mr. J. G. Miller  
Vice President  
P. O. Box 542  
Reading, Pennsylvania 19603

Gentlemen:

Enclosed is AEC Material License No. SM-1313 authorizing the receipt, possession, inspection and storage of special nuclear material and the receipt, possession and storage of byproduct material. In addition, the license authorizes the packaging of fuel elements for delivery to a carrier. This authority enables you to return fuel elements to their shipping containers if there is a need to transfer the elements to another location, e.g., return to the manufacturer. The delivery of the elements to a carrier for transport must be in accordance with 10 CFR Part 71, "Packaging of Radioactive Material for Transport," copy enclosed. In this regard, your attention is directed to paragraph 71.1(b) of Part 71, which provides a general license under specified conditions for the use of certain shipping packages which have been licensed for use by another licensee.

Please note the license conditions in Items 8 and 11 of the license. These conditions were discussed with and agreed to by Mr. Donald Reppert of your organization.

Also enclosed are four copies of Indemnity Agreement No. B-64 for your review, acceptance and return of one signed copy.

The AEC uses electronic data processing equipment to record the location by licensee of special nuclear material. This system uses a three-letter reporting identification symbol to identify a licensee who submits material transfer reports and periodic materials status reports in accordance with Sections 70.53 and 70.54 of 10 CFR Part 70. For this purpose, we have assigned to you the Reporting Identification Symbol: YZR. An explanation of when and how to use this symbol is given in the enclosed instruction sheet. Your cooperation will be appreciated.

Sincerely,

L. C. Rouse, Chief  
Fuel Fabrication and  
Reprocessing Branch  
Directorate of Licensing
