Inspection Summary

Inspection on December 5-7, 1978 (Report No. 50-156/78-05)

Areas Inspected: Routine, unannounced inspection of the approved security plan and its implementation relative to the protection of SNM; security organization; access controls; alarm systems; surveillance procedures; security program review; and protection against radiological sabotage. Additionally, the inspectors reviewed the licensee's action on a previous item of noncompliance identified during a physical inspection conducted on June 19-21, 1978. The inspection involved 29 inspector-hours onsite by two NRC inspectors.

Results: Of the nine areas inspected, no items of noncompliance were identified.
