 2. Review of Small Break Transients in Combustion Engineering Nuclear Steam Supply System, CEN-114-P, dated July, 1979.

Dear Mr. Reid:

Reference (1) transmitted an NRC request for additional information concerning the Small Break LOCA Analysis in the light of events which occurred at Three Mile Island Unit 2. As a result of this request, an Owners Group was formed which has worked closely with Combustion Engineering, Inc. to produce the requested response.

Reference (2) contains the Owners Group and Combustion Engineering responses to this request. This report supercedes the preliminary documentation submitted to you on July 18, 1979. This response is applicable to Fort Calhoun Station Unit No. 1 and, therefore, constitutes our response to Reference 1.
