ORDER TO CEASE AND DESIST

I

On the basis of an investigation conducted on January 9 through 28, 1980, it appears that the firm incorporated under Michigan law as Gorsira X-Ray, Incorporated, (the "Company") is in possession of and is using by-product material in the form of sealed radioactive sources for the conduct of field radiography. The Atomic Energy Act of 1954, as amended, and the Commission's regulations prohibit the receipt, use, and possession of by-product material except as authorized in a specific or general license issued by the Commission. The NRC has not authorized the Company to receive, use or possess by-product material nor has it authorized the Company to conduct field radiography. Consequently, the use and possession of by-product material by the Company is in violation of the Atomic Energy Act of 1954, as amended, and the NRC regulations issued pursuant thereto.

II

Accordingly, pursuant to the Atomic Energy Act of 1954, as amended, and the Commission's Rules and Regulations in 10 CFR Parts 2 and 30, IT IS HEREBY ORDERED THAT:

- (1) The Company shall cease and desist effective immediately from further use of sealed radiographic sources;

- (2) The Company shall store all by-product material in its possession and, with respect to such storage, shall comply with the provisions of 10 CFR Part 20, "Standards for Protection Against Radiation," (copy enclosed); and

- (3) The Company shall promptly, and in any event within ten days of the receipt of this Order, transfer the by-product material in its possession to a person authorized to receive it and within 24 hours of such transfer notify by telegram the NRC of the name, address, and location of the person to whom the material was transferred.

III

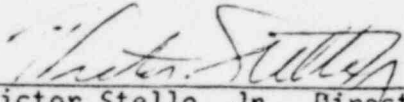

The Company may within twenty-five days of the date of this Order request a hearing. If a hearing is demanded, the Commission will issue an Order designating the time and place of hearing. Any request for a hearing will not stay the effectiveness of this Order.

In the event the Company demands a hearing as provided above, the issues to be considered at the hearing shall be:

- (a) whether the circumstances described in Section I existed and
- (b) whether, on the basis of those circumstances, this Order should be sustained.

This Order is effective upon issuance.

FOR THE NUCLEAR REGULATORY COMMISSION
