MEMORANDUM FOR: John McKinley, Chief
Project Review Branch #1, ACRS
FROM: Roger J. Mattson, Director
Division of Systems Safety, NRR
SUBJECT: EXCERPTS OF DRAFT 3 OF THE TMI-2 ACTION PLAN

Per our conversation late last week, enclosed are seven copies of key pieces of an internal staff working version of draft 3 of the TMI Action Plan, fresh off the presses today. I am transmitting them to you this afternoon so that they might be provided to the subcommittee members for their reading tonight in preparation for tomorrow's meeting on the NTOL requirements. These excerpts, read in context of draft 2 of the Plan and the EDO's February 6, 1980 memo that transmitted the revised NTOL list and other documents to the Commission, should be sufficient background material for the subcommittee meeting. That is, if one has read draft 2, the February 6 memorandum, and the excerpts of draft 3 provided here, that should be sufficient homework for considering the necessity and sufficiency of the NTOL list. Additional descriptive materials for aiding the subcommittee deliberations on the NTOL list will be provided in our briefing at tomorrow's meeting. In addition, I will handcarry 25 copies of the entire internal staff working version of draft 3 of the Action Plan to the subcommittee meeting tomorrow. The copies of this internal draft are being printed tonight and will be provided to Mr. Fraley for distribution to all ACRS members in advance of the Thursday full committee meeting on the NTOL requirements.

Original signed by
Roger J. Mattson

Roger J. Mattson, Director
Division of Systems Safety

Enclosures: Excerpts of Action Plan

1. Introduction
2. Table 1
3. Chapter Summaries
4. Appendix A - NTOL list:
development and resource
requirements
5. Appendix B - Prioritization of
Action Items
