Expired License No. 12-12812-02
Expiration Date: 9/30/78

Gentlemen:

This refers to the telephone discussion between Ms. F. Ferrell of this office and you on February 14, 1979.

NRC records show the Byproduct Material License identified above has expired and no renewal application has been filed in accordance with Section 30.37 of Title 10, Code of Federal Regulations, Part 30.

From our discussion with you we learned that you still possess material which requires a specific NRC license. Your possession of that material without a valid, specific license is a violation of Section 30.3, 10 CFR Part 30.

If you want to continue your program, you must immediately submit the enclosed Form NRC-313, "Application for Byproduct Materials License" to the Radioisotopes Licensing Branch, Office of Nuclear Materials Safety and Safeguards, U. S. Nuclear Regulatory Commission, Washington, D.C., 20555. A copy of the letter forwarding the application to the licensing branch (but not the application) should be sent to Region III, U. S. Nuclear Regulatory Commission, 799 Roosevelt Road, Glen Ellyn, Illinois, 60137, Attention: Jack Finn.

Also, you must place the radioactive material on hand in secure storage until such time as you acquire a valid license. No other use of the material on hand or purchase of additional byproduct material is authorized.

First National Bank
of Chicago

- 2 -

Since your present license has expired, your application for renewal will be processed as a request for a new license. Accordingly, you must determine if your program is subject to a license fee as required by Section 170.31, 10 CFR Part 170 and, if one is required, submit the appropriate fee along with the application.

We request that you give prompt attention to this matter.

Sincerely,

C. J. Paperiello, Chief
Materials Radiological
Protection Section No. 1
