ARTHUR E. LUNDVALL, JR.
VICE PRESIDENT
SUPPLY

Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attn: Mr. Robert W. Reid, Chief
Operating Reactors Branch #4
Division of Operating Reactors

Subject: Calvert Cliffs Nuclear Power Plant
Units Nos. 1 & 2, Docket Nos. 50-317 & 50-318
Supplement to Request for Amendment
to Operating License

- Reference: a) BG&E letter dated 8/27/79 from A. E. Lundvall
to H. R. Denton, Request for Amendment to
Operating License.
b) BG&E letter dated 7/26/78 from A. E. Lundvall
to R. W. Reid Request for Amendment to Operating
License.

Gentlemen:

Reference (a) requested modifications to the Calvert Cliffs Unit 2 Technical Specifications to incorporate measurement--calculational uncertainties of 6.0 and 7.0 percent on F_r and F_q , respectively. NRC Staff noted that Reference (a) did not contain a safety evaluation specific to Unit 2 and requested that one be provided. The following paragraph provides the requested safety evaluation.

Safety Evaluation

The requested uncertainties are larger than those currently in the Technical Specifications and will, therefore, increase the constraints on plant operation. Consequently, implementation of the requested uncertainties will have no adverse effect on the consequences of the Design Basis Events reported in Unit 2, Cycle 2 License Application (Reference B). A review of the Unit 2 Technical Specifications has been conducted to ensure that no other technical specifications would be affected by approval and implementation of this request.
