The Inservice Inspection Section of the Materials Engineering Branch, Division of Engineering, has reviewed the circumstances of the February 28, 1980 steam generator leak occurrence and the results of the subsequent steam generator inspection at Point Beach Unit 2. Information reviewed included LER-80-2 dated February 29, 1980 as subsequently updated on March 12, April 16, and May 16, 1980 and additional information submitted by letter dated April 25, 1980.
