Mr. J.H. Sniezek, Director
Division of Fuel Facility
and Materials Safety Inspection
Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Director Sniezek:

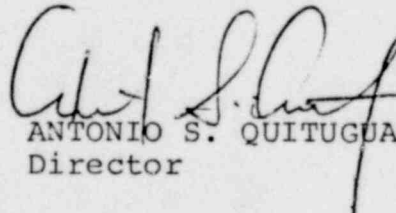

We have received your letter regarding the disposal of our Cobalt-60 irradiator. Our disposal plans include the following:

1. Seek local appropriation for shipment of unit to Canada, specifically to the Atomic Energy of Canada Limited.
2. Continue seeking interested parties to safely remove and relocate (off-island) for their own use.

We also wrote to Chief Book of Region V requesting assistance to have our unit properly disposed. To date, we have not heard of any such assistance. Please advise us if your commission can provide financial assistance in the proper disposal of our unit.

We look forward to your response.

Sincerely,

ANTONIO S. QUITUGUA
Director
