Dear Mr. McCorkle:

Docket 70-8

In accordance with the revisions set forth in 10 CFR, Part 73.50(h), we are enclosing six copies of Site Security Personnel Training Plan for Battelle's Columbus Laboratories.

Our security personnel training plan has been predicated upon our current authorized possession limit of less than formula (5000 g) quantities of unirradiated special nuclear material, as stipulated under License SNM-7, Amendment No. 16, dated July 26, 1977. The remainder of our authorized limits under SNM-7 covers irradiated special nuclear material for processing activities at our Hot Cell Laboratory.

The format of the plan follows Regulatory Guide 5.52 and is responsive to the performance criteria as defined in 10 CFR, Part 73, Appendix B. We shall be happy to respond to any questions that may arise during your evaluation of the plan. Formal implementation of the plan will be in accordance with 10 CFR, Part 73.50(h).

Should you have questions or require clarification on any aspect of the training plan, please contact either Arthur D. Brown, 614-424-5896 or Harley L. Toy, 614-424-7791.

Very truly yours,

Harley L. Toy
