In response to our letter dated November 17, 1976

Gentlemen:

Thank you for informing us of the corrective and preventive actions you documented in response to our correspondence.

With respect to the corrective actions taken to avoid further items of noncompliance, we understand that the Plant Superintendent has reiterated to the Mechanical Department Supervision the need to follow station procedures. Furthermore, we understand that during periodic high maintenance work loads, the inspection of fire supervision equipment is to receive sufficient priority to assure that the inspection schedule is met. This understanding was reached in a telephone conversation between Mr. Potts of your staff and Mr. Spessard of this office on December 22, 1976.

Your cooperation with us is appreciated.

Sincerely,

Robert T. Carlson
