

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

FEB 16 1979

DOCKET NO.: STN-50-560
FACILITY: BOPSSAR
APPLICANT: Fluor Power Services, Incorporated
SUBJECT: SUMMARY OF JANUARY 26, 1979 ACRS SUBCOMMITTEE AND
FEBRUARY 9, FULL ACRS MEETINGS

On January 26, 1979, the BOPSSAR subcommittee met with the staff and applicant to discuss the BOPSSAR/BSAR-205 application. And on February 9, 1979, the full Committee met and discussed the standard application. A copy of the transcript of these meetings is available in the NRC Public Document Room.

Both meetings were relatively short since this was the second submittal for BOPSSAR, this time using the B&W reference NSSS.

The staff discussed the scope of review in that it only reviewed changes from the previous submittal necessitated by interfacing with the B&W BSAR-205.

Fluor made presentations on (1) organization, (2) incorporation of operating experience, (3) physical separation, (4) decontamination and decommissioning, and (5) systems interaction studies.

The full Committee indicated they would write a favorable letter to the Commission.

A handwritten signature in cursive script that reads "James C. Snell".

James Snell, Project Manager
Standardization Branch
Division of Project Management

cc: W. Larkin, Vice President
