0 3	the ground in the vicinity of the sulfuric acid storage tank. Acid lines in
0 4	the area were isolated and the flow of liquid arrested. Chemical analyses were
0 5	performed on the suspect material which was verified to be acid. It is esti-
06	[mated that less than 5 gallons of sulfuric acid was discharged to the bay via
07	the storm drains. No environmental impact is considered due to the small amount
0 8	of acid released.
