

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

NRC PDR

January 26, 1979

Dockets Nos. 50-72  
and 50-407

The University of Utah  
College of Engineering  
ATTN: Dean of Engineering  
2000 Merrill Engineering Building  
Salt Lake City, Utah 84112

Gentlemen:

The Commission has issued the enclosed Amendment No. 9 to Facility License No. R-25 for the AGN-201M reactor and Amendment No. 3 to Facility Operating License No. R-126 for the TRIGA Mark I reactor. These amendments incorporate your physical security plan as part of the license conditions to conform with 10 CFR 50.54(p). We discussed this with Dr. Sandquist on October 31, 1978. As part of the license renewal process for Facility License No. R-25, we evaluated your entire physical security plan to determine adequacy for both the TRIGA and AGN-201M reactors. This was done because both reactors are located within the same room of the Nuclear Engineering Laboratory and are considered as being on one site.

From our evaluation, we have determined the level of protection afforded by the provisions of the security plan is acceptable for the protection of both the AGN-201M and the TRIGA reactors. This evaluation is on file in this office and is withheld from public disclosure pursuant to 10 CFR 2.790(d). Although the University of Utah nuclear reactor physical security plan is now incorporated in the licenses, it is also withheld from public disclosure pursuant to 10 CFR 2.790(d).

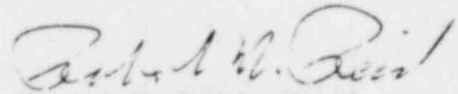

Future changes which do not decrease the effectiveness of your plan do not require prior NRC approval but should continue to be reported as provided in 10 CFR §50.54(p). Changes which do require prior NRC approval should be identified as license amendment requests.

As your plan deviates from the normal format, it is difficult to follow and review. We therefore, request that you reconcile the plan and revisions with a single document for inclusion when the License R-25 is renewed. Enclosed is a copy of guidance to assist you in formatting your plan. To

790306 0626

facilitate future revisions and amendments submitted pursuant to 10 CFR 50.54(p), it is further requested that it be in loose-leaf format.

Sincerely,

Robert W. Reid, Chief  
Operating Reactors Branch #4  
Division of Operating Reactors
