

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

February 21, 1979

Mr. Dave Kellar
Route 4, Box 169
Louisa, Va. 23093

Dear Mr. Kellar:

Mr. Rosenthal has asked me to acknowledge his receipt of your letter of February 4, 1979 with respect to the North Anna nuclear facility. The Appeal Board assigned to the operating license proceeding for that facility currently has the pumphouse settlement matter under active consideration. The Board will issue an order dealing with the matter when its study of it has been completed.

Sincerely yours,

Margaret E. Du Flo
Margaret E. Du Flo
Secretary to the
Appeal Board

Dear Mr. Rosenthal, Esq., Chairman
Atomic Safety & Licensing Appeal Board

2/4/79

This letter is about the North Anna Nuclear Power Plant.

I live within 15 miles of this plant and have long been concerned about the safety of this plant. In fact its apparent that VEPCO has along history of bad management. They for years hid the fact that they were building on a geological fault, the pump house is sinking fast and is now probability below safe limits, actual radiation levels in the confinement building exceeded the predicted by 1800 %. The list goes on and on.

What I think you should do at this point is to:

- 1) Revoke VEPCO's North Anna Operating License
- 2) Hold public hearings and make public all the risks of the North Anna plant not just the ones VEPCO is forced in to revealing.
- 3) Not allow increased settlement of the pump house.

Your prompt reply covering all of these concerns would be greatly appreciated.

Dave Kellar
