Subject: Application Amendment - License No. XR-104

Dear Mr. Oplinger:

General Electric has received the subject license authorizing export of equipment for the Leibstadt reactor in Switzerland.

General Electric hereby requests amendment of the license to include an additional intermediate consignee as follows:

Byron Jackson Nuclear Products
4870 AA Etten-Leur
The Netherlands

Please note the license currently authorizes another intermediate consignee - Rotterdam Nuclear - in the Netherlands.

The first shipment to this intermediate consignee is scheduled for February 1, 1979.

Presently, only one shipment is scheduled for export to this intermediate consignee. The shipment will consist of 2 hydrostatic bearings which must be installed in a coolant pump for the Leibstadt reactor. It is our understanding that the value of these bearings is less than \$100,000.

The amendment is urgently needed in order to maintain project schedules.
The bearings will be exported promptly upon receipt of the license.

Very truly yours,

B. D. Wilson, Manager
