

UNITED STATES OF AMERICA NUCLEAR REGULATORY COMMISSION  
BEFORE THE ATOMIC SAFETY AND LICENSING BOARD

In the Matter of  
HOUSTON LIGHTING AND POWER COMPANY }  
(Allens Creek Nuclear Generating }  
Station, Unit 1) }

Docket no. 50-466

Request For Suspension of Proceedings by Intervenor,  
Allens Creek Alternative Sites Discussions.

I understand that a meeting has been called by the NRC for 8th. Feb. 1979 in Houston for the purpose of discussing with the Houston Lighting and Power Company, the applicant for the Allen Creek Nuclear Power Plant project (Docket no. 50-466) The matter of alternative sites for a Nuclear Plant Electrical Generating Plant.

I submit as both the Houston Audubon Society and I did at the Public Hearing in March 1975 and have since resubmitted, that the meeting and its subject matter at this time is of itself prima facie evidence of the deficiencies of the Environmental Impact Statement and Supplement to the REIS relating to this project. Further it is submitted that the deficiencies disclosed by the occurrence and subject matter of this meeting and other deficiencies demonstrate, that the obligations and legal requirements of NEPA and subsequent court rulings and the guide lines of the CEQ have not been met.

I submit that this above referenced meeting and subject matter give further standing to my allegation as to the inadequacies of the FEIS and Supplement (August 1978) relating to the Allens Creek Project as submitted by me as intervenor in the ongoing hearings. This discussion implies that 'new matter' material to the case has developed since the hearing of March 1975 and thus makes the consideration of the proposed plants site a proper matter for consideration in the current hearings constraints, self imposed by the NRC and the Applicant.

I request that no further action be taken by you or the NRC in the matter of licencing this Allens Creek project or any substitute or alternative plant, or site or project, by the applicant H.L. and P. until such time as a complete and full FEIS is submitted, as legally required for this Allens Creek project.

420 Mulberry Lane  
Bellaire  
Texas, 77401.

Intervenor.

Respectfully submitted,

A handwritten signature in cursive script, appearing to read "D. Marrack", with the date "8 Feb" written to the right.
