Gentlemen:

Our company is involved in the design of fences for Nuclear Power Plants. Many times problems are encountered in our plans due to a lack of information concerning regulations and standards put forth by your commission.

Would you please send us any information available from your office dealing with the past, present, and any expected future actions regarding fences required for Nuclear Plants. If this information is not available from you, would you please direct us to the proper source.

Sincerely,

Robert Scott
Field Supervisor
