

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

JUN 6 1979

Mr. W. F. Naughton
Nuclear Licensing Administrator
Pressurized Water Reactors
Commonwealth Edison Company
P.O. Box 767
Chicago, IL 60690

Dear Mr. Naughton:

SUBJECT: NRC ACCEPTANCE OF ADDENDUM TO QA TOPICAL REPORT

By letter dated February 28, 1979, you submitted Addendum No. 1 consisting of revised pages to the Commonwealth Edison Topical Report No. CE-1-A, "Commonwealth Edison Company Quality Assurance Program for Nuclear Generating Stations." Addendum No. 1 concerns organizational changes only applicable to the Zion Nuclear Station, Unit Nos. 1 & 2 (Docket Nos. 50-295 & 50-304). In your May 1, 1979 transmittal, you resubmitted the identical pages with the added designation of Revision 7. You also included additional pages addressing the cover sheet and table of contents.

We have evaluated Revision 7 and have found that it does not change our prior conclusions. Your revised topical report meets the criteria of Appendix B to 10 CFR Part 50 and is therefore acceptable. To use the topical report in future license applications, CECO need only reference this topical report in Section 17 of the Safety Analysis Report. We do not intend to repeat our review of this topical report when it is referenced in an application.

Should regulatory criteria or regulations change such that our conclusions about this topical report are invalidated, we will notify you. You will be given the opportunity to revise and resubmit it should you so desire. Programmatic changes by CECO to this topical report are to be submitted to the NRC for review prior to implementation. Organizational changes are to be submitted no later than 30 days after announcement.

Please retain our acceptance letter of December 13, 1978 for CE-1-A, Revision 6, and add this letter to your report.

Should you have any questions regarding our review or if we can provide assistance, please feel free to contact me or Mr. William Belke at (301) 492-7741.

Sincerely,

2231 057
