Director of Nuclear Reactor Regulation
Attn: Mr. S. A. Varga, Chief
Light Water Reactors Branch No. 4
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir:

Three Mile Island Nuclear Station, Unit 2 (TMI-2)
Operating License No. DPR-73
Docket No. 50-320
Startup Report

Section 6.9.1.3 of the TMI-2 Technical Specifications requires that a Startup Report be submitted within nine months following initial criticality. Initial criticality for TMI-2 occurred on March 28, 1978. Therefore, on December 28, 1978, we submitted a Startup Report for TMI-2. However, that report did not include all the information associated with initial criticality, completion of the Startup Test Program and commencement of Commercial Operation (Commercial Operation for TMI-2 did not begin until December 30, 1978). Therefore, a Supplementary Startup Report was filed on March 23, 1979, in accordance with the requirements of Section 6.9.1.3 of the TMI-2 Technical Specifications. That Supplementary Report included some additional information, however, the Startup Report for TMI-2 is not yet complete. Therefore, in accordance with the requirements of Section 6.9.1.3 of the TMI-2 Technical Specifications, enclosed please find Supplementary Startup Report #2 for TMI-2. This report includes the following information:

- 5.2 Nuclear Instrumentation Calibration at Power
- 5.8 Pseudo Control Rod Ejection Test

Additional information, which is needed to complete the TMI Startup Report, will be submitted in the future when appropriate manpower is available.

Sincerely,

J. G. Herbein
Vice President
Generation
