Staff Issues Safety Evaluation Report with Confirmatory Items Related to the License Renewal of the Peach Bottom Atomic Generating Station Units 2 and 3

On October 7, 2019, the staff issued the “Safety Evaluation Report with Confirmatory Item Related to the License Renewal of the Peach Bottom Atomic Generating Station Units 2 and 3.” This safety evaluation report (SER) reflects the status of the staff’s review of Exelon’s subsequent license renewal application, through August 13, 2019, and is the first SER associated with the review of a subsequent license renewal for a boiling water reactor. Exelon plans to submit a timely supplement to their application to allow the staff to review and close the confirmatory item prior to the meeting with the Advisory Committee on Reactor Safeguards Subcommittee on License Renewal, which is scheduled for November 5, 2019.

Staff Accepts SHINE Medical Technologies, LLC Operating License Application

On October 8, 2019, the staff accepted and docketed the SHINE Medical Technologies, LLC (SHINE) operating license application submitted on July 17, 2019. The letter includes an estimated 36-month review schedule. The NRC staff plans to engage SHINE proactively in regulatory audits and public meetings to efficiently resolve certain information gaps as part of a detailed technical review. The proposed SHINE Medical Isotope Production Facility would consist of up to eight subcritical operating assemblies and one production facility licensed under 10 CFR Part 50 for the production of medical radioisotopes, such as molybdenum-99. The NRC staff previously issued a construction permit to SHINE in February 2016. Site excavation began in September 2019.

List of Approved Spent Fuel Storage Casks: Holtec International Storage, Transport and Repository 100 Storage System; Certificate of Compliance No. 1008, Amendment No. 3; Direct Final Rule; Confirmation of Effective Date; Part 72 of Title 10 of the Code of Federal Regulations; (Regulatory Identifier Number 3150-AK35; NRC-2019-0126)

On October 10, 2019, the NRC published a document in the *Federal Register* (84 FR 54465) confirming the effective date of November 5, 2019, for the direct final rule that was published in the *Federal Register* on August 22, 2019 (84 FR 43729). This direct final rule amended the NRC's spent fuel storage regulations by revising the Holtec International Storage, Transport and Repository (HI-STAR) 100 Storage System listing within the "List of approved spent fuel storage casks" to include Amendment No. 3 to Certificate of Compliance No. 1008. The effective date of November 5, 2019, is confirmed.
