UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

February 25, 1980

Docket Nos. 50-325  
and 50-324

Mr. William Webster  
Carolina Power and Light Company  
336 Fayetteville Street  
Raleigh, North Carolina 27602

Dear Mr. Webster:

Health Systems Division, Equifax is under contract (NO. NRC-01-79-010) to the U. S. Nuclear Regulatory Commission (NRC), to study the feasibility of performing epidemiologic studies on the health effects of exposure to low-level ionizing radiation. This study was mandated by the Congress of the United States in Public Law 95-601. Information concerning data relevant to epidemiologic studies will be solicited by one or more individuals from Equifax's project team. Individuals who may be assigned to this task include:

Richard W. Clapp  
Samuel J. Covino, Jr.  
Nancy A. Dreyer  
Frederic H. Fahey

Emmy R. Friedlander  
James R. Latham  
Jeanne E. Loughlin  
Richard R. Monson  
James Watson

Visits are planned for sometime in mid-March.

Information provided will be used to determine the adequacy of data upon which to make conclusions on feasibility and recommendations to the Congress. Equifax is not itself performing an epidemiologic study. What is needed is the types and detail of the data recorded and information on how they are obtained. (See enclosed forms for the type of information required.) No personal identifiers are required. Questions will be asked to determine the quality of the data. Any information considered proprietary will be maintained confidential by Equifax.

Your cooperation in this effort will be appreciated, and will help ensure that the results are useful to the Congress, the industry, and the NRC.

If you have any questions, please call the NRC technical monitor, Mr. Robert Goldsmith (301-443-5860).

Sincerely,

*Thomas A. Ippolito*  
Thomas A. Ippolito, Chief
