Washington DC 20555

Dear Ms. Hemby:

Enclosed you will find our application for license to export nuclear material reference SA-1.

Please note that the end users statement describes five items as follows: Models 576, 577, 578, 512B, and 504L. The last two items models 512B and 504L do not require an export license and therefore I am requesting a license for only the first three items.

I am enclosing a copy of our catalog which describes the Plutonium, Enriched Uranium and Neptunium foils. The information will be found on page 21 under plated fission foils.

I hope that the above information is satisfactory to your requirements, please feel free to contact me should you require any further information.

Very truly yours,

REACTOR EXPERIMENTS, INC.
