SECV

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

February 1, 1980

Docket No. 50-213

Mr. W. G. Council, Vice President  
Nuclear Engineering and Operations  
Connecticut Yankee Atomic Power Company  
Post Office Box 270  
Hartford, Connecticut 06101

Dear Mr. Council:

In response to the Commission's Show Cause Order issued on January 2, 1980, your submittals dated January 17 and 22, 1980, provided documentation indicating that completion of some of the Category A requirements for the Haddam Neck Plant necessitates equipment which is expected to become available on the following schedule:

<u>Item</u>	<u>Delivery Date</u>
2.1.4	May 15, 1980

After reviewing this matter, we conclude that you have shown that necessary equipment will not be available for implementation by January 31, 1980. For those items the implementation schedule of within 30 days of receipt of the equipment but no later than June 1, 1980 (or prior to startup from your refueling outage beginning May 1980), as specified in the Order, is appropriate.

As indicated in our letter dated October 30, 1979, the acceptability of your implementation of each Category A item (excluding 2.1.7a) will be the subject of post implementation review. Should your information concerning the availability of the equipment change, notify this office within five days of receipt of the new information.

Sincerely,

A handwritten signature in dark ink, appearing to read "Harold R. Denton".

Harold R. Denton, Director  
Office of Nuclear Reactor Regulation
