IE BULLETIN NO. 80-22 RESPONSE

Dear Sir:

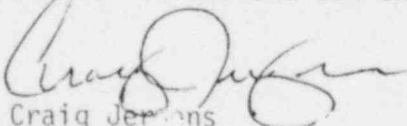

This correspondence is a response to NRC Bulletin IE 80-22 regarding the possession and use of Automation Industries Model 200-520-008 sealed source connectors.

Our actions regarding the five items contained in the Bulletin are as follows:

- 1) We possess no Model 200-520-008 cameras or equivalent equipment with the "quick disconnect" type of connector.
- 2) No action required.
- 3) Radiographers have been made aware of the condition described in the Bulletin.
- 4) We are presently reviewing our Radiation Safety Manual for modifications and will consider the impact of these conditions.
- 5) Radiographers have been informed of the importance of making surveys. Radiographer performance and compliance to regulations continues on a quarterly audit basis.

Sincerely,

CHERNE CONTRACTING CORPORATION

Craig Jerrens
Radiation Safety Officer
