Director of Nuclear Reactor Regulation
ATTN: Mr. J. F. Stolz, Chief
Operating Reactor Branch #4
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Subject: Arkansas Nuclear One-Unit 2
Docket No. 50-368
License No. NPF-6
Proposed Technical Specification
(File: 2-1511.1, 2-2040)

Gentlemen:

We wish to withdraw our proposed technical specification changes transmitted to you in our letters dated April 17, 1979, and May 18, 1979, from further staff consideration. The proposed changes would have allowed us to operate ANO-2 without fire watches in several safety related areas without intact 3-hour fire barriers until September 1, 1979. Not implementing the subject proposed change will not adversely affect the health and safety of the general public. We will maintain our fire watches in the subject areas until the fire barriers are upgraded to a 3-hour rating by installing the required fire dampers.

Very truly yours,

William Cavanaugh, III
