POOR ORIGINAL

Dear Ms. Higgins:

As discussed with P. O'Reilly of this office, enclosed are copies of the following information:

- (1) Letter transmitting NUREG-0560 to power reactor applicants and licensees.
- (2) Safety evaluations for the five B&W operating reactors regarding compliance with the Commission's Orders issued in May 1979.
- (3) "NRR Status Report on Feedwater Transients in B&W Plants," dated April 25, 1979.
- (4) I&E Bulletin 79-05C and 79-06C.

The other items in your request are not available at this time. These include:

- (1) NUREG-0565
- (2) Recent LEK's on North Anna and Prairie Island
- (3) Staff evaluations of I&E Bulletins on B&W plants.

We expect that each of these documents will be available in November 1979.

You also requested the status of NUREG-0560 recommendations and inquired whether these recommendations are being tracked and by whom. The recommendations in NUREG-0560 have been addressed by a number of NRR Task Forces that were organized to consider TMI-2 concerns. These include Lessons Learned, Emergency Preparedness and Operator Licensing, in addition to our own Bulletins and Orders Task Force. There is no status report available at the present time which summarizes the implementation of each of the NUREG-0560 recommendations.
