EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

02 On 11-9-79 during routine operation the "A" Diesel Generator failed to

03 start from the control room. After a second unsuccessful attempt, the

04 redundant diesel generator was started and operators dispatched to locally

05 start the unit. Upon taking local control, the unit was started twice

06 locally and once from the control room. Since then the unit has been

07 successfully started 8 times without problems.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

10 The cause of the start failures is unknown since the major factors

11 affecting starting capability appeared normal. To assure confidence in

12 the unit's starting ability, it was started daily for the next 4 days.

13 The unit has been started on 4 separate occasions since that time. No

14 recurrence of the start problem was encountered.
