UNION ELECTRIC COMPANY
CALLAWAY PLANTS, UNITS 1 & 2

Union Electric Company hereby files an amendment to its application of April 30, 1974, for two Construction Permits and two Operating Licenses for a nuclear plant designated Callaway Plant, Units 1 and 2.

With respect to Callaway Plant, Unit 1, docket no. STN 50-483, this amended application for the issuance of an operating license consists of: (1) the general information required by 10 CFR 50.33; (2) the technical information required by 10 CFR 50.34, in the form of the SNUPPS Final Safety Analysis Report and the Callaway Plant Site Addendum to that report; and (3) the Environmental Report required by 10 CFR 51.21. The Callaway Plant Security Plan and anti-trust review information are being submitted under separate cover.

With respect to Callaway Plant, Unit 2, docket no. STN 50-486, this amended application consists of the technical information required by 10 CFR 50.34 and identified above as the SNUPPS Final Safety Analysis Report and Callaway Plant Site Addendum. In addition, the Environmental Report identified above for Unit 1 of the Callaway Plant includes information on the environmental effects of the operation of both units. Additional information required to complete the amended application for the issuance of an operating license for Callaway Plant, Unit 2, including supplementation of the general information and environmental report identified above, will be filed at a later date consistent with the scheduled completion of construction of that unit.

This amendment contemplates that the NRC staff will conduct its review through the issuance of a Safety Evaluation Report for Callaway Plant, Units 1 and 2, and an Environmental Impact Statement on Callaway Plant, Unit 1 leading to the issuance of an operating license for Unit 1. Following the later supplement to the operating license application for Unit 2, it is anticipated that an Environmental Impact Statement on Callaway Plant, Unit 2 would be prepared.
