Inspection Summary

Areas Inspected: Unannounced inspection of the licensee's security plan and its implementation relative to the protection of SNM, security organization, access control, alarm systems, keys, locks and hardware, communications, surveillance, procedures, security program review, and protection against radiological sabotage. The inspector also reviewed the previously identified weakness and item of concern. The inspection involved 9 on site hours by one NRC inspector.

Results: Of the 11 areas inspected, no items of noncompliance were identified within the scope of the inspection.
