

BALTIMORE GAS AND ELECTRIC COMPANY

P.O. BOX 1475

BALTIMORE, MARYLAND 21203

ARTHUR E. LUNDVALL, JR.
VICE PRESIDENT
SUPPLY

January 21, 1980

William P. Gammill, Acting Assistant
Director for Operating Reactor
Projects
Division of Operating Reactors
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Sir:

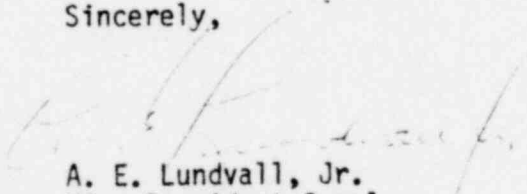

This letter is in response to your letter of October 2, 1979, concerning acceptance of Oak Ridge Associated Universities (ORAU) training of NRC staff members.

At this time, we at Calvert Cliffs are willing to accept this training as meeting the requirements for generic training in radiation safety. NRC staff members so trained would be required to complete only a short site-specific indoctrination here at Calvert Cliffs, including training in security, site emergency plan, and industrial safety. If access is desired to areas requiring respiratory protection, then additional training in site-specific respiratory protection procedures would be required, followed by a "booth test".

It should be noted that the ORAU course length, content, and documentation seem not to conform completely with the August, 1979 draft of the Regulatory Guide: "Radiation Protection Training for Light-Water-Cooled Nuclear Power Plant Personnel". Future adjustments may have to be made when this Regulatory Guide is issued.

Should you have any questions or comments in this matter, we would be happy to discuss them with you.

Sincerely,

A. E. Lundvall, Jr.
Vice President Supply
