

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

January 2, 1980

Docket No. 50-213

Mr. W. G. Council, Vice President
Nuclear Engineering and Operations
Connecticut Yankee Atomic Power Company
Post Office Box 270
Hartford, Connecticut 06101

Dear Mr. Council:

The Commission has issued the enclosed Show Cause Order for the Haddam Neck Plant. Your submittals of October 18, 1979, November 21 and 30, 1979, December 7 (two submittals), 10, 12, 13, 14 and 18, 1979, regarding implementation of the short-term lessons learned requirements indicate that you do not intend to implement some of the "Category A" requirements until after January 31, 1980. We have determined that implementation of the "Category A" requirements by January 31, 1980, is necessary to provide continued assurance of public health and safety.

The Show Cause Order requires that you implement, by January 31, 1980, the "Category A" requirements of NUREG-0578 regarding short-term lessons learned, as supplemented by our letters of September 13, and October 30, 1979; or show cause why you should not. Because this Order is immediately effective it also requires that the "Category A" requirements be implemented by January 31, 1980, or the plant be shut down. A provision regarding equipment availability problems is included.

In your submittals, you did indicate that many of the "Category A" requirements would be implemented by January 1, 1980. It is not the Commission's intent, in issuing this Order, to encourage delays in implementation of those "Category A" items you currently have scheduled to complete by January 1, 1980. Therefore, you should still submit, on or shortly after January 1, 1980, a description of the methods used to implement the "Category A" requirements completed by that time.

"Category B" lessons learned requirements, those scheduled for implementation by January 1, 1981, will be the subject of future correspondence.

A copy of this Order is being filed with the Office of the Federal Register for Publication.

Sincerely,

Harold R. Denton

Harold R. Denton, Director
Office of Nuclear Reactor Regulation
