Docket No. 50-547

Public Service of Indiana
ATTN: Dr. James Coughlin
Vice President, Nuclear
1000 East Main Street
Plainfield, IN 46168

Gentlemen:

On November 28, 1978, the U. S. Nuclear Regulatory Commission will conduct a one-day seminar on the new Model Radiological Effluent Technical Specifications for Nuclear Power Plants. These Technical Specifications are being sent to you separately from NRC Headquarters. Representatives from the Office of Nuclear Reactor Regulation will make presentations at the seminar. The agenda will include an introduction and background of the effluent technical specifications, the development of Standard Technical Specifications, the method and schedule for implementing the new technical specifications and the major changes of the new technical specifications. A question and answer period will follow the prepared presentations.

You are invited to send representatives to this seminar to be held at the Holiday Inn, Glen Ellyn, Illinois. We encourage you to send those members of your staff most closely involved in your radiological effluent and radiological environmental monitoring programs.

Please complete the preregistration form (page 2 of the Seminar Information Sheet) and return it to this office no later than November 17, 1978.

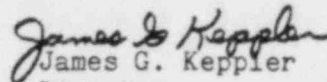

It would be extremely beneficial if you would submit (also by November 17) specific questions concerning the topics you would like to hear discussed so that the speakers will be able to provide answers to those questions that apply to the entire audience. We will try to

7811130/63

NOV 7 1978

answer any and all questions pertaining to radiological effluent and radiological environmental monitoring programs; however, if the problem is only specific to your case and not of general interest to the entire audience, our office or the Office of Nuclear Reactor Regulation, as appropriate, will communicate with you directly, rather than at this seminar.

Sincerely,

James G. Keppler
Director

PROPOSED AGENDA FOR REGIONAL SEMINARS ON
RADIOLOGICAL EFFLUENT TECHNICAL SPECIFICATIONS

Utility Representatives

- I. Introduction and Background
 - A. Standard Tech Specs
 - B. Appendix A vs. Appendix B
 - C. Implementation of Appropriate Regulations
 1. 10 CFR Part 20
 2. 10 CFR Part 50
 3. 40 CFR Part 190
- II. Schedule for Implementation
 - A. OL Applications
 - B. Operating Reactors
- III. Interfaces with NRR
- IV. Development of Standard Tech Specs
 - A. NRC Task Force
 - B. AIF Task Force
 - C. Approval By R³C
 - D. Deviations from Standard Tech Specs
- V. Method of Implementation
 - A. Amendment to Operating License
 - B. Amendment to FSAR

VI. Major Changes from Present Tech Specs

- A. 10. CFR Part 50, Appendix I
- B. 40 CFR Part 190
- C. Maintenance and Use of Equipment
- D. Solidification - Process Control Program
- E. Special Reports (40 CFR Part 141)
- F. Environmental Monitoring

VII. Discussion of NUREG-0133

VIII. Discussion of Tech Specs

- A. LCO
- B. Action
- C. Surveillance

IX. Question and Answer Period
