Docket No: 50-364

APPLICANT: Alabama Power Company

FACILITY: Joseph M. Farley Nuclear Plant Unit 2

SUBJECT: SUMMARY OF FEBRUARY 7, 1980 MEETING REGARDING REVIEW OF OPERATING LICENSE APPLICATION

The staff met with the applicant at the Farley Nuclear Plant to view Farley Unit 2 piping systems and to discuss its confirmatory piping analysis as a part of the review of the operating license application. In addition, Mr. David Meyer and Mr. Alan Fine viewed the control room and other safety significant parts of the plant as a part of their training. Enclosure 1 is a list of attendees.

Enclosure 2 is a summary of the part of the visit concerning the confirmatory piping analysis.

A handwritten signature in cursive script that reads "L. L. Kintner".

FEB 12 1980

Docket No. 50-364

APPLICANTS: Alabama Power Company

FACILITY: Farley 2

SUBJECT: SUMMARY OF FEBRUARY 7, 1980, SITE VISIT

On February 7, 1980, we met with representatives of Alabama Power, Southern Services, and Bechtel at the Farley 2 site. The purpose of the meeting was to view various piping systems throughout the plant and to choose one for our confirmatory analysis. This analysis will be performed by Pacific Northwest Laboratory.

Upon completion of the plant tour, we informed the applicant that we had chosen the "A" Main Steam Line from the steam generator nozzle to the containment penetration. We will analyze this line for normal loads plus the SSE. We discussed the methods which Bechtel had used in seismically analyzing the main steam line. We informed the applicant that we might wish to include the steam generator in our model and would like to have further discussions with Westinghouse. We described the types of information which the applicant should submit so that we might analyze the line. The meeting was adjourned.

A list of attendees is attached.
