Gentlemen:

This refers to the inspection conducted by D. E. Moore of this office on January 21-25, 1980, of activities authorized by NRC License No. NPF-4 at North Anna Nuclear Station and to the discussions of our findings held with J. W. Ogren at the conclusion of the inspection.

Areas examined during this inspection included your physical security program as implemented under the provisions of Title 10, Code of Federal Regulations, Part 73, "Physical Protection of Plants and Materials" and the specific requirements of your approved Security Plan. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, performance tests, and observations by the inspectors.

During the inspection, it was found that certain activities under your license appear to be in noncompliance with NRC requirements. This item and references to pertinent requirements are listed in the Notice of Violation enclosed herewith as Appendix A. Corrective actions to prevent recurrence were completed prior to the conclusion of this inspection; therefore, a reply is not requested.

In accordance with Section 2.790(d) of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, activities involving safeguards and security measures are exempt from public disclosure; therefore, the enclosures to this letter with the exception of the report cover page, which is an inspection summary, will not be placed in the Public Document Room.
