Re: NRC IE Bulletin 79-28, "Possible Malfunction of NAMCO  
Model EA180 Limit Switches At Elevated Temperatures,"  
dated December 7, 1979 - Docket No. 50-367

Dear Mr. Keppler:

This letter is in response to IE Bulletin No. 79-28 dated  
December 7, 1979. We have determined, through correspond-  
ence with our NSSS vendor and architect/engineer, that NAMCO  
Model EA-180 limit switches described in the referenced IE  
Bulletin have not been and will not be installed on any  
safety-related equipment located inside or outside containment,  
including valve position indicating circuitry related to contain-  
ment isolation valves.

Very truly yours,

A handwritten signature in dark ink, appearing to read "E. Shorb", is written over a horizontal line.
