July 29, 1980

Mr. Charles E. McDonald
U.S. Nuclear Regulatory Commission
Transportation Branch
Washington, D.C. 2055

Dear Mr. McDonald:

Covering letter dated June 11, 1980, for submittal of
"Safety Analysis Report for the Model BMI-1 Shipping
Cask, Revision A, March 28, 1980".

The referenced letter was submitted requesting renewal of the Certificate of Compliance of the BMI-1 Shipping Cask for the normal period of 5 years. On July 11, 1980, Mr. Richard Odegaarden of your office indicated that the only change requested by your office to Revision A of the SARP was to include the materials of construction and welding specifications on the main drawing of the cask. Accordingly, enclosed are eight copies of this revised drawing number 43-6704-0001, Revision B. With the addition of the information, the drawing identification has been upgraded to Revision B as requested by Mr. Odegaarden. Please substitute these drawings for the Revision A drawings in the eight copies of the SARP submitted on June 11, 1980.

Thank you for the expedient review. This will enable us to continue to schedule use of the cask without interruption.

Sincerely,

Richard J. Burian
Principal Research Engineer
Nuclear and Flow Systems Section
