

APPENDIX A

NOTICE OF VIOLATION

Tenneco Chemicals, Incorporated  
Nixon, New Jersey 08818  
License No. 10646-02

Docket No. 30-9387

Based on the results of an NRC inspection conducted on June 19, 1980, it appears that certain of your activities were not conducted in full compliance with NRC regulations and the conditions of your license.

10 CFR 20.203(b) requires that each radiation area be conspicuously posted with a sign or signs bearing the radiation caution symbol and the words: "Caution Radiation Area."

10 CFR 20.202(b)(2) defines a "radiation area" as any area, accessible to personnel, in which there exists radiation at such levels that a major portion of the body could receive in any one hour a dose in excess of 5 millirem.

Contrary to this requirement, on June 19, 1980, the day of the inspection, no warning sign was posted in the vicinity of calender #2, where a radiation level existed, such that a person could receive, in any one hour, a dose in excess of 5 mrem.

This item is a deficiency.
