POOR ORIGINAL

Dear Person:

I should like to know the present status of 5 nuclear power plants having construction permits in effect. The five plants I am inquiring about are -

- 1 Callaway Plant Unit 1 in Fulton, Missouri
- 1 Callaway Plant Unit 2 in Fulton, Missouri
- 1 Wolf Creek Generating Plant Unit 1 in Burlington, Kansas

- Black Fox Nuclear Station Unit 1 in Anola, Oklahoma
- Black Fox Nuclear Station Unit 2 in Anola, Oklahoma

8001210 180-

Are they now actually under construction? If
under construction will they be completed at
predicted time of completion? Is there
a possibility they will never be completed - the
project simply will be shelved? Is it
possible the project could be completed, but
as a coal fired plant?

Please, all possible current information on
these plants. Thank you.

Diary entry,
Rubith Tataruk
