In the Matter of Mississippi Power & Light
Company, Grand Gulf Nuclear Station Numbers
1 and 2, Docket Nos. 50-416A and 50-417A.

Gentlemen:

You may recall that Mississippi Light & Power Company ("MP&L"), the Applicant in the above-captioned proceeding, addressed a letter to you dated December 10, 1979, representing that MP&L had agreed to the wheeling provision sought by the Municipal Energy Agency of Mississippi and its members from the 500 KV interconnection with the Gulf States Utilities Company and consequently, that Condition 5 of Applicant's License Commitments had been satisfied.

We are in receipt of a letter of February 5, 1980, from MP&L's corporate sibling, Louisiana Power & Light

Hon. Richard M. Webster, Jr. ✓
Mayor, City of Clarksdale

Subject: Clarksdale-Lafayette Transaction

Gentlemen:

Louisiana Power & Light Company wrote to some of you on May 7, 1979 in connection with this matter, and we are enclosing a copy of that letter for your easy reference.

We have no knowledge at this time of the status of your negotiations. Since it is possible that those negotiations have now proceeded to the point where you may be ready to reach a contract, and since LP&L has still not heard from the City of Lafayette with respect to entering into a transmission agreement covering the subject transaction, we feel compelled to reiterate our expressions of May 7, 1979.

Just so that there will be no doubt in anyone's mind, this is to state that Louisiana Power & Light Company must be paid for the use of its transmission facilities. LP&L will not permit the use of its facilities without proper compensation.

Trusting that everyone understands what we have said above, we will await a communication from the City of Lafayette so that an appropriate transmission service schedule can be discussed and executed.

Yours very truly,

LOUISIANA POWER & LIGHT COMPANY

Gentlemen:

Re: Clarksdale-Lafayette Transaction

We see from a copy of the April 27, 1979, Stampley to Naylor letter that the MP&L-GSU general contract is close to being completed. I am glad to hear that the negotiations have proceeded this well, and the purpose of this letter is to remind you of one other step that must be completed before the exchange can take place. I am referring to the fact that even with the 500-kv line in service--of which LP&L owns a portion, 83% of the Lafayette-Clarksdale exchange flows over LP&L transmission. So not only does LP&L own a portion of the 500-kv line between Lafayette and MP&L, its other transmission system will be utilized in transmitting the major portion of this power even with the 500-kv line in service. Therefore, it will be necessary for Lafayette to execute a transmission service schedule with LP&L to permit the Clarksdale exchange to take place.

Yours very truly,

Jack Davey
Chief Engineer
