

U.S. NUCLEAR REGULATORY COMMISSION  
OFFICE OF INSPECTION AND ENFORCEMENT

REGION III

Report Nos. 50-546/79-28; 50-547/79-28

Docket Nos. 50-546; 50-547

License Nos. CPPR-170; CPPR-171

Licensee: Public Service of Indiana  
1000 East Main Street  
Plainfield, IN 46148

Facility Name: Marble Hill Nuclear Generating Station, Units 1 and 2

Inspection At: Region III office, Geln Ellyn, Illinois

Inspection Conducted: December 10, 1979

Inspectors: C. C. Williams, Chief *C.C. Williams* 1/3/80  
Projects Section 2

F. C. Hawkins *F.C. Hawkins* 1/2/80

E. R. Schweibinz *C.C. Williams for* 1/3/80

Approved By: *G. Fiorelli* 1/3/80  
G. Fiorelli, Chief  
Reactor Construction and  
Engineering Support Branch

Inspection Summary

Inspection on December 10, 1979 (Report Nos. 50-546/79-28; 50-547/79-28)

Areas Inspected: This was a special announced meeting to discuss the development of the licensee's response to the "Order Conforming Suspension of Construction" dated August 15, 1979, in the form of the Marble Hill Construction Verification Program. This inspection involved a total of 20 inspector-hours at the RIII office by four NRC inspectors.

Results: No items of noncompliance or deviations were identified.

Q

## DETAILS

### 1. Attendees

#### Public Service of Indiana (PSI)

J. Bott, Licensing Manager  
T. R. Burns, Project Engineering Manager  
S. K. Farlow, Special Projects Engineering Supervisor

#### Management Analysis Company (MAC)

R. E. Turner, Quality Assurance Manager  
D. J. Ashley, Project Engineering Manager

#### NRC

G. Fiorelli, Chief, Reactor Construction and Engineering Support  
Branch (RC&ESB)  
C. C. Williams, Chief, Projects Section 2(RC&ESB)  
F. C. Hawkins, Reactor Inspector  
E. R. Schweibinz, Reactor Inspector

### 2. Meeting

The meeting was initiated by PSI to present their planned and in-process Construction Verification Program in response to the first issue identified in the NRC "Order Confirming Suspension of Construction", dated August 15, 1979.

These discussions focused on the PSI preliminary draft of the Construction Verification Program. The program included a list of items which address Safety Related work functions previously performed on the site. The verification functions listed with each item are to assure that all safety related construction work performed is acceptable. Each item was discussed with the licensee and the minimum acceptable requirements were clarified by the NRC representatives.

Further meetings with NRC to discuss the licensee's progress regarding the issues identified the August 15, 1979 order are planned.

### 3. Item of Concern Raised by the Subcommittee on Environment, Energy, and Natural Resources

During the hearing by the above subcommittee on November 27, 1979, Mr. Moffett introduced into the record the Marble Hill Project Monthly Quality Assurance Progress Report for May, 1977, dated June 16, 1977.

This report stated in part, "PSI has not yet issued a Purchase Order or Letter of Intent to Newberg Marble Hill. Although all work has been accomplished under the same conditions that would be expected had the issuance been accomplished, undue criticism may be expected. The potential for a possible Citation from the NRC, if discovered during an audit, is greatly compounded ..."

This item was discussed at this meeting and further information, in addition to that already provided by Mr. F. R. Hodges, was requested. This item remains unresolved. (546/79-28-01; 547/79-28-01)

#### Unresolved Items

Unresolved items are matters about which more information is required in order to ascertain whether they are acceptable items, items of noncompliance, or deviations. Unresolved items disclosed during the inspection are discussed in Paragraph 3 of the Details Section.
