Attn: Mr. James P. O'Reilly

Reference: RII:JPO; 50-424; 50-425; Interim Report of Potential 10CFR50.55e  
(Dewatering and Erosion of Backfill)

Gentlemen:

On November 14, 1979 Mr. E. D. Groover, QA Site Supervisor at Plant Vogtle, reported to your Mr. Tom Conlon that a potential reportable item under 10CFR50.55e existed at Plant Vogtle concerning dewatering and erosion of backfill.

Since our interim letter of January 15, 1980, log GM-551, Georgia Power Company has transmitted two letters to the NRC which provided the current status of our program. One letter, dated February 12, 1980 (GM-568), was directed to Region II; the other, dated February 6, 1980 was directed to NRR with a copy to Region II.

At this time, Georgia Power Company is still unable to establish a definite completion date for the final report. An additional update and, if possible, a date for the final report will be provided by March 15, 1980.

Very truly yours,

Doug Dutton  
Project General Manager
