Mr. R. H. Engelken
Regional Director
U.S. Nuclear Regulatory Commission
1990 N. California Boulevard
Suite 202, Walnut Creek Plaza
Walnut Creek, California 94596

Docket No. 50-312
Rancho Seco Nuclear Generating Station
Unit No. 1

Dear Mr. Engelken:

In response to IE Bulletin 79-14, we have completed the inspection of the second half of the accessible portion of our redundant safety related piping systems. This portion of the inspection plan was identified as Phase 3 in our September 5, 1979 submittal. Attachment 1 shows the results of this inspection.

Our September 5, 1979 submittal identified some items where re-analysis was required to verify the initial engineering judgement. Reanalysis of all items so designated has been completed. Attachment 2 shows the results of this reanalysis.

Should you have any questions, please contact Larry Smith at (916) 452-3211.

Sincerely yours,

John J. Mattimoe
Assistant General Manager
and Chief Engineer
