Re: Docket No. 70-1193

Dear Mr. Rouse:

The Kerr-McGee Nuclear Corporation hereby makes application to continue its plutonium plant decommissioning activities beyond that which has been approved by the Commission as Amendment No. 3, dated March 9, 1979. Attached is our application to complete the decommissioning activities leading to the termination of License No. SNM-1174. This application is titled "Termination Plans Parts IV, V and VI."

As you are aware, your branch requested that application for this plan be made in several increments or parts. One copy of the previous application parts are included, along with sketches and procedures referenced in these plans. We are confident that your files already contain this material, however, we felt it might be convenient for you to have an additional copy.

Activities described in parts IV, V and VI are planned to commence during the 1st quarter of 1980, so your early review of this submittal will be sincerely appreciated.

If you have any questions or need more details, please call.

Very truly yours,

W. J. Shelley

W. J. Shelley, Director
 Regulation and Control
