ATTENTION: Mr. Herbert E. Book
(Chief Fuel Facility & Materials
Safety Branch)

SUBJECT: NRC Inspection

Gentlemen:

This is in reference to your letter dated September 22, 1980, on C&R LABORATORIES Activities under NRC License No. 53-19179-01, being in noncompliance with condition 17, requiring that licensed material be possessed and used in accordance with statements, representations, and procedures as contained in C&R LABORATORIES application dated September 29, 1979. C&R LABORATORIES did not comply with application form K-2 in regards to "(Showing readings in Mr/Hr or R/Hr and Distance in feet from Source)".

On July 9, 1980, all correction steps were taken and all forms (K-2) were corrected in regards to "Showing Readings in Mr/Hr or R/Hr and Distance in feet from Source". As of that date of inspection by Mr. Fong, C&R LABORATORIES has corrected this infraction and has seen to it, that this error of noncompliance will not happen again.

8010310 1149

September 30, 1980

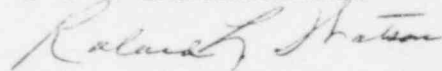

I am very glad that Mr. Fong had brought this to my attention during our discussion at the conclusion of his inspection, among other helpful things (see NRC Compliance Audit Report enclosed).

This correction was made immediately after his inspection and summarized in our Audit so as to be reviewed monthly by C&R LABORATORIES, as a reminder on areas that had been accidentally overlooked.

Please check the enclosed Audit by C&R LABORATORIES which shows every detail which was summarized after Mr. Fong's inspection. As you will see, every detail that Mr. Fong discussed with us (Mr. Watson) in his conclusion of the inspection was seriously summerized and immediately corrected (so as to also avoid any further noncompliances).

Sincerely,

C & R LABORATORIES

Roland L. Watson

President/General Manager

C&R LABORATORIES
APPENDIX II
NRC COMPLIANCE AUDIT REPORT # 01
"COMPLIANCE FOR INSPECTION 7/8/80"

(TITLE OF AUDIT)

References: (if applicable)

1. Purpose: Compliance in regards to NRC Inspection on 7/8/80
2. Scope: Area or process audited were covered in all areas in regards to the U.S. Nuclear Regulatory Commission Materials License for C&R Laboratories License number 53-19179-01 Expiration Date March 31, 1985.
3. Audit Team Members: Mr. F. T. FONG

4. Persons Contacted: Mr. Roland L. Watson/C&R Laboratories.
5. Summary: (Note: AREAS NOTED FOR A BETTER COVERAGE)
 - a) Show dose rate when doing survey at the roped-off area and areas that signs are located.
 - b) All sheets did not show any indications of any readings at the roped off area (2mr/Hr.)
See records sheet procedures (K-2) and survey sheet & sketch of restricted area.
 - c) Fill out one log sheet per day for each inspection.
 - d) Survey of Camera shows (3mr/hr @ 6" from the camera) & (30mr/hr @ contact)
 - e) Reminded to Audit one-self.
 - f) Reminded to never use survey meter if calibration is up.
 - g) Reminded to complete Quarterly Report by 7/11/80.
 - h) Reminded to complete Quarterly Report of Source Inventory under regulations 10CFR 34-Sec. .26

(Continued)

6. Audit Findings and Recommendations:

Findings: C&R Laboratories Procedures ITEM 6-(e), page 15, paragraph K-2, requires a record of the daily utilization log per sample attached (K-2), showing the surveys & sketch of the restricted area, along with the readings in MR/HR OR R/HR and distance in feet from the source. None of the surveys & sketch of the restricted area showed the MR/HR or R/HR at the roped area and the location in feet.

Recommendation: Do not forget to log in on all "survey & sketch of the restricted area" the MR/HR or R/HR found during the survey at the roped barrier and the distance in feet from the source.

Correction: On 7/9/80, a complete Audit and report was completed and corrections made immediately.
