Subject: I E Bulletin 80-22: Automation Industries, Model 200-520-008  
Sealed Sources Connectors.

Dear Sir:

In regards to the above bulletin, Detroit Testing Laboratory does not have and has never utilized the above mentioned Automation Industries, Model 200-520-008 Sealed Source Connectors.

Detroit Testing Laboratory utilizes IR 192 Gamma Century, Model S.A. Cameras under our license number 21-18302-01. The Gamma Century Cameras are equipped with the new Saf-T-Key coupling, which is virtually impossible to disconnect during use due to its design.

Based on our experience with and upon our operation and emergency procedures with the above equipment, we feel that no further action is required by our company as long as we continued to utilize the Gamma Century Cameras.

Thank you for your continual response and bulletins which aid companies like our selves, in being advised of possible safety problems as well as keeping up with the latest requirements.

Sincerely,  
DETROIT TESTING LABORATORY, INC.
