RADIAL PEAKING FACTOR LIMIT REPORT

Gentlemen:

In accordance with Technical Specification 6.8.1.6, Georgia Power Company submits in the enclosure a revised Radial Peaking Factor Limit Report for Cycle 1 operation of Plant Vogtle Unit 1. Submittal of this revised report is necessitated by the implementation of an administrative F_0 limit of 2.25 as discussed in our letters SL-4065 (1/29/88) and SL-4072 (1/29/88). The revised F_0 and radial peaking factor limits were implemented on February 9, 1988. The enclosure also contains a revised elevation dependent peaking factor versus core height figure which is submitted in support of the subject report.

Please contact this office if you have any questions.

Sincerely,

L. T. Gucwa

JH/lm
