Summary of Changes – UFSAR Revision 27

R.E. Ginna Nuclear Power Plant

Renewed Facility Operating License No. DPR-18

10 CFR 50.71(e)(2)(ii) requires that revisions to the UFSAR include changes made under the provisions of 10 CFR 50.59. Accordingly, the list below identifies plant changes included in Revision 28 of the R. E. Ginna Nuclear Power Plant Final Safety Analysis Report (Updated).

<u>Change No.</u>	<u>Description</u>
027.01	This revision to Section 3.6.2.5.1.8 is a descriptive change to better reflect the commitments made to resolve SEP Topic III-5.B.
027.02	This change revises Sections 6.3.3.12 and Figure 6.2-15 and Table 6.2-29 to reclassify valves 9080 and 9080C.
027.03	This change revises Table 7.4-2 and 7.5-1 to allow use of either element of dual element RTD TE-410A for Reactor Coolant Loop B Leg Temperature.
027.04	This change revises Chapters 1, 4, 5, 6, 9, and 15 to allow the use of Optimized Zirlo cladding material.
027.05	This change revises Section 8.3.2.1.1 to allow for use of a battery performance test or modified performance test.
027.06	This change revises Sections 7 and 15 to clarify existing information and provide additional information to Analog Channel Testing sections regarding the use of bypass testing instrumentation for selected RTS and ESFAS functions.
027.07	This change revises Section 9.3.4.3.3.10 to correct RMW Tank Lining Description.
027.08	This change revises Section 5.4.1.1.2 and Figure 5.4-3 to add a description of the modified the modified No. 1 Seal Insert Rings with SDS
027.09	This change revises Section 10.7.7.1.2 to add a description for the Passive Hydrazine Injection System.
027.10	This change revises Table 6.3-8 to clarify description for valves 857A, B, and C.
027.11	This change revises Section 9.1.2 to correct a copy/paste error.
027.12	This change revises Section 8.2.1.1.4 to modify the Breaker Backup description.
027.13	This change revises Sections 2.4, 3.4, and 13.5.2.2.3 to add discussion on Beyond Design Basis Flood Evaluation.
027.14	This change revises Section 7.2.4.3 to revise the wording discussing online functional testing frequency.
027.15	This change revises Section 12.3.4.2 to remove monitors from description.
027.16	This change adds newly identified components to Section 18.1.3.

ATTACHMENT 1

Summary of Changes – UFSAR Revision 27

R.E. Ginna Nuclear Power Plant

Renewed Facility Operating License No. DPR-18

<u>Change No.</u>	<u>Description</u>
027.17	This change revises Section 18.2.1.19 to modify PSPM Program description to more accurately characterize it.
027.18	This change revises Section 13.5.1.2 to align with TS 5.4.1.
027.19	This change revises Sections 13.4.2 and 13.4.3.1 to reflect removal of NSRB from QATR and new controls per PI-AA-116.
027.20	These changes clarify Appendix R language/usage.
027.21	This change revises Section 13.1.3.9 and Figure 13.1-8 to reflect recent organizational change.
027.22	This change revises Section 1.8.2.12 to add a statement for battery service test SFCP.
027.23	This change incorporates new Ex-Vessel Neutron Dosimetry Modification.
027.24	This change corrects NOS-identified discrepancies in Chapter 13 Organizational Charts.
027.25	This change reflects the reduction in scope for Local Leak Rate Testing for TS 5.5.15.
