

2. A (watertight) concrete curb eight inches high and six inches thick will be poured around the entire cable warehouse area. This curb will be bonded to the concrete floor slab by means of an epoxy sealer. This curb is needed to contain any rainfall and water from potential fire fighting operations.

C. Restrictions on Use of the Cable Warehouse

1. The cable warehouse will be used for the storage of low-level compactible/noncompactible trash only. Compactible/noncompactible trash will be basically composed of the following materials:
 1. Paper, including blotter paper
 2. Plastics
 3. Respirator cartridges
 4. Protective clothing
 5. Laboratory equipment (vials, glassware, plastic bottles)
 6. Tape and rope
 7. Piping and valving
 8. Scaffolding and ladders
 9. HEPA filters
 10. Mop heads
 11. Other wood and small metal objects
2. The total activity of waste stored in the cable warehouse will not exceed 1,320 curies.
3. All containers of waste which will be stored in the cable warehouse will be removed no later than two years from the official date of NRC approval of our license amendment.
4. No wooden boxes or other combustible boxes will be placed in this storage location.
